

Dallen Larson

Software Engineer | AI Product Development | C# | Full-Stack

Birmingham, AL dallenlarson.com linkedin.com/in/dallen-larson
[dallen@dallenlarson.com] | [(512) 762-3299]

Technical Skills

AI & Product: ChatGPT, Claude, LLM-Assisted Development, Rapid Prototyping, Product Development

Development: C#, .NET, JavaScript, SQL, HTML/CSS, REST APIs, Git/GitHub

Enterprise: Epicor Kinetic, Application Studio, BPMs, Functions, BAQs, Integrations, Automation

Selected Project

DECKRISE — Founder / Developer

2025 – Present

DECKRISE.net

Independent

- Built and launched **DECKRISE**, a data-driven web product for analyzing MARVEL SNAP tournament results, deck performance, competitive trends, and matchup data.
- Used **ChatGPT and Claude throughout development** for implementation, architecture, debugging, data workflows, prototyping, and rapid product iteration.
- Own the product end to end: identified the problem, defined features, designed and built the application, deployed it, and continue to maintain and improve it.
- Built data workflows that transform raw tournament results into useful competitive analysis and an accessible user-facing product.

Professional Experience

Epicor ERP Software Engineer

Apr 2024 – May 2025

Six S Partners Inc.

Remote

- Built **Epicor Kinetic** software solutions using C#, Application Studio, BPMs, Functions, BAQs, dashboards, workflows, and REST API integrations.
- Worked directly with customers and non-technical users to understand workflows, identify friction, and turn business requirements into working software and automation.
- Independently investigated complex production issues, identified root causes, and implemented reliable solutions across customer environments.
- Supported implementations and **Go Live** events for clients including Norwest Precision, Poltech, RPM, and others.

Software Engineer — Freelance

Jan 2026 – Present

Independent

Remote

- Build software using **C#, APIs, web technologies, ChatGPT, and Claude**, independently owning investigation, development, testing, debugging, and delivery.
- Work directly with clients to turn loosely defined problems into practical technical solutions.

Software Engineer — Contract

Dec 2023 – Jun 2025

Rook Studios

Hybrid

- Owned technical implementation and troubleshooting across C# projects while collaborating with designers, artists, writers, and developers to turn requirements into working software.

Full-Stack Developer

Jun 2017 – May 2025

Larsonsoft

Austin, TX

- Built and maintained full-stack applications using **C#, JavaScript, SQL, HTML/CSS, and REST APIs**, independently managing projects from requirements through deployment.

Education

Nashville Software School

Aug 2022 – Aug 2023

Software Developer — Full-stack development: C#, .NET, SQL, JavaScript, React, REST APIs, Git/GitHub
